PROJECTS

Smart Phone Recommendation Application
Mentor: Mrs. Suvarna Kadam | **Team Size:** 2

Key Skills: Python   Pandas   Tkinter   Matplotlib

A recommendation system for mobile phones built using item to item based collaborative filtering approach, that can suggest mobile phones to the user based on their price range and interests which they provide .

Virtual Tourist Guide

Key Skills: Image Processing   Google API   Web Scraping

The Google's Vision API driven Virtual Tourist Guide app provide location based live image processing of monuments and landmarks. In this, we develop a user friendly application in which we take into account their preferences and provide smart recommendations on them. This app also allows the users to add to the knowledge of creation about the monument/landmark.

Blockchain Enabled E-Waste Management System
Mentor: Mrs. Vaishali Kolhe, Mrs. Aditi Kalia | **Team Size:** 4

Key Skills: Blockchain   Smart Contracts

A project on Smart Contracts for an E-Waste Management system to overcome major challenges in the treatment and implementation of E-Waste through a Decentralized Application which will create rules for blockchain based modules and ensures transparency through secure transactions.
